

Support-force examples: weak views vs mined impostors

Weak views preserve local content; impostors are Euclidean-nearest roll/shuffle variants.

Anchor **Weak view** **Weak view** **Weak view** **Mined impostor** **Mined impostor** **Mined impostor**

row 1: Euclidean top-5 weak mass 0.6; MS-stat 1.0

row 2: Euclidean top-5 weak mass 0.6; MS-stat 1.0

row 3: Euclidean top-5 weak mass 0.6; MS-stat 1.0
